

Additional True Wave II® full spectrum heating panel

Price

[Ask a question about this product](#)

The True Wave II™ Full Spectrum Mini Heater is a compact version of the True Wave II™ heaters you will find on the front of Sanctuary™ sauna models.

True Wave II™ full spectrum heating panels incorporate all three wavelengths, near infrared, mid infrared and far infrared, all in one heating panel and established the term full spectrum infrared panels.

Clearlight Infrared® saunas use a special type of halogen bulb in their patented True Wave® full-spectrum heating panels, providing a wide range of infrared wavelengths, as well as powerful heat. Not only are they energy efficient to operate, but they also heat up quickly compared to other heaters.

Providing an additional 300 watts of full-spectrum heat to your sauna will not only slightly increase the maximum temperature of your overall session, but will also provide better access to the therapeutic benefits of full-spectrum infrared radiation.

Compatible with all Sanctuary™ sauna models.

Simultaneous use with RED LIGHT THERAPY TOWER is not possible.

True Wave II® Full Spectrum Heating Panels

True Wave II™ full spectrum heating panels incorporate all three wavelengths, near infrared, mid infrared and far infrared, all in one heating panel and established the term full spectrum infrared panels.

Clearlight Infrared® saunas use a special type of halogen bulb in their patented True Wave® full spectrum heating panels, providing a wide range of infrared wavelengths, as well as powerful heat. Not only are they energy efficient in operation, but they also heat up quickly compared to other heaters.

See the spectral analysis of infrared heat emission from the full spectrum heating panels below:

Measuring Front emission with reflector: Total power consumption 500W Percentage of radiation from the front emitter = 98.6%

Features

Power: 300W

Dimensions: 60.96 cm × 17.78 cm × 10.16 cm

Warranty: Life time for residential use and 5 year for commercial use

[User Instructions](#)

[Sauna Door Connection Instructions](#)

The plug of the FULL SPECTRUM MINI HEATER is of type IEC C14 (male) and connects inside a Clearlight sauna to an IEC 13 (female) socket.

Externally, for connection to a Schuko socket, you will need an adapter from IEC 13 (female) to Schuko (e.g. <https://www.skROUTZ.gr/search?keyphrase=schuko+iec13>).
