[Ask a question about this product](#)

The set (2*GCV+GPE+GL500) includes a plate with a screw (GCV), a special plug for the socket (GPE) and a 5m 2.5 mm² grounding cable (GL500).

In case of grounding 2 separate sheets of the same or different material (e.g. cover for a double bed) choose the double set (2*GCV+GPE+2*GL500).

All treated armor fabrics, e.g. ready-made curtains, mosquito nets, floor coverings, sleeping bags, etc. have a velcro surface already sewn on.

Alternatively, you can choose the fabric grounding set with magnet.

GCV

1 5 cm hook-and-loop fastener with 36x36x6 mm connection plate, all necessary screws, washers, cable covers and a screwing tool with Torx®-Bits.

GPE

Earthing plug (CEE 7/7) for portable textile products, such as mosquito nets, sleeping bags, bed linens, etc. (up to 2 connections).

Fixed shielding products (paints, etc.) must not be grounded with this plug. In the case of grounding floor coverings, you can ask us to replace the GPE with the fixed socket plug GP1.

Includes: Earthing plug with protective cover 60x60x15 mm, all necessary screws, washers, cable covers and a screwing tool with Torx®-Bits.

GL500

Grounding cable 2.5 mm², 5m long, to connect GCM, GPE to each other. Also available in dimensions 20cm, 1m, 2m, 5m, 10m.
